6. Others:

- How clear is the purpose of this website?
- Can you tell "Where you are" from the top of the page?
- Can you tell "Where you can go" easily? ie: Is there navigation present and does it make sense? Does it work?
- Did it "Make you think?" – it shouldn't.
- Does it contain an appropriate amount of content (text/images) given its purpose/topic?
- Is the visual design pleasing? (C.R.A.P. / G.E.A.R.S)
- Custom link colors present? Layered elements?
- Does the project stand out in some way?
- Test the page responsiveness. Is it working? If not, find out what the plan is. Any thoughts?
- Peek at the HTML/CSS: Is it well organized and easy to understand? If you were asked to modify the site is it well documented enough to do so?
- Anything else that might help improve the page?
